

Introduction to Numerology

Johan Oldenkamp & Billy Dale Lawhorn

In this paper, we explain the basics of Numerology. We also explain Reverse Numerology, and we discuss an ancient North-European alphabet consisting of so called *Runes* that was used before the current Latin letters.

Numerology

Pythagorean Numerology translates letters into ciphers according to the table below.

1	2	3	4	5	6	7	8	9
a	b	c	d	e	f	g	h	i
j	k	l	m	n	o	p	q	r
s	t	u	v	w	x	y	z	

By continuing to add up all ciphers, each series of numbers can be expressed as a single cipher. In some cases, a number of more than one ciphers has a special numerological meaning (e.g. 11). In that case, that multi-cipher number is the numerological unit.

Reverse Numerology

In Reverse Numerology, we calculate the numerological value of numbers written as words.

Number	Word	Value	Total	Result	Cumulative	
1	one	655	16	7	16	122
2	two	256	13	4	29	
3	three	28955	29	11	58	
4	four	6639	24	6	82	
5	five	6945	24	6	106	
6	six	196	16	7	122	
7	seven	15455	20	2	142	138
8	eight	59782	31	4	173	
9	nine	5955	24	6	197	
10	ten	255	12	3	209	
11	eleven	535455	27	9	236	240
12	twelve	255345	24	6	260	
13	thirteen	28992555	45	9	305	
14	fourteen	66392555	41	5	346	
15	fifteen	6962555	38	11	384	
16	sixteen	1962555	33	6	417	
17	seventeen	154552555	37	1	454	
18	eighteen	59782555	46	1	500	

The numerological results of the words one up to eighteen contain five times a 6. Some of the numerological values of these number-words are very meaningful, but we will come back to that later on in this paper. Adding up the numerological values of the words one up to eighteen results in exactly 500. Also please note that the numerological value of eleven (11) is 27 (9). So also Numerology connects 9 and 11 (just like the events of 9/11).

Now let us look at the numerological values of the German words for the nine ciphers.

Cipher	German	Value	Total	Result
1	<i>eins</i>	5951	20	2
2	<i>zwei</i>	8559	27	9
3	<i>drei</i>	4959	27	9
4	<i>vier</i>	4959	27	9
5	<i>funf</i>	6356	20	2
6	<i>sechs</i>	15381	18	9
7	<i>sieben</i>	195255	27	9
8	<i>acht</i>	1382	14	5
9	<i>neun</i>	5535	18	9

The numerological results of the German words for one up to eighteen contain six times a 9. Adding up the three remaining values also results in a 9. Next, also adding up the ciphers of the first three German words that have the numerological value of 27 (9) results in 9. Perhaps we can now understand why Guido von List, who spoke German, became so interested in Numerology.

Runes

The knowledge on the ancient North-European alphabet of the Runes was preserved by the Austrian researcher Guido von List. His book called '*Das Geheimnis der Runen*' (English: 'The Secret of the Runes') was published in 1908 and is nowadays available as a free online e-book on the internet (go to the German part of Pateo.nl to read this book). There are 18 different runes or Armanen 'Futharkh', as Guido von List referred to them. The table below shows these 18 ancient symbols, including their names and the letter that represents each symbol. The occult group that secretly led the Nazi regime in Germany in the previous century was very interested in these symbols and their meaning. Both the symbols of SS and the swastika originate from this ancient alphabet of the Runes, as we will discuss below. In our modern time, we find these ancient letters in the symbols of German car brands. We will also explain this later on.

No.	Symbol	Name	Letter	Cumulative	
1		<i>Fa</i>	F	1	21
2		<i>Ur</i>	U	3	
3		<i>Thur</i>	Th	6	
4		<i>Os</i>	O	10	
5		<i>Rit</i>	R	15	
6		<i>Ka</i>	K	21	
7		<i>Hagal</i>	H	28	57
8		<i>Nauth</i>	N	36	
9		<i>Is</i>	I	45	
10		<i>Ar</i>	A	55	
11		<i>Sol</i>	S	66	
12		<i>Tyr</i>	T	78	
13		<i>Bar</i>	B	91	93
14		<i>Laf</i>	L	105	
15		<i>Man</i>	M	120	
16		<i>Yr</i>	Y	136	
17		<i>Eh</i>	E	153	
18		<i>Ge</i>	G	171	

When we look at the symbols of the Runes alphabet, we can see that there are a number of mirrored pairs of symbols. These pairs are 1 & 4, 6 & 10, 8 & 17, and 15 & 16. The seventh symbol is very special, since it is a combination of both 8 & 17 and 15 & 16. In a way, also the eighteenth symbol is a combination, namely of two lightening symbols of Sol. This S symbol clearly refers to light, since also Sol is the Latin word for Sun.

The Runes based off of the poems of Odin

Odin is the consciousness behind every person, the 'I am'. Odin has many companion's, which represent some of the runes. Odin rode an eight legged horse named *Sleipnir*. Sleipnir is the 13th Rune (Bar) which represents the third eye. People who have studied the pineal gland say's it looks just like the eye of an octopus, which is why Sleipnir has eight legs. 'Third eye' also equals 13, when broken down in numerology (4+9=13). Old pictures of Sleipnir also have his legs in the shape of two triangles, which is what the 13th Rune looks like.

Odin also carried a spear called *Gungnir*. Gungnir is the 14th Rune, which represents the Kundalini and the human spine. The word fourteen broken down in Numerology equals 4+1,

and Kundalini broken down in Numerology also equals 41. The 14th Rune also lands on the sign of Scorpio in the Zodiac. The symbol of Scorpio is the scorpion, and his stinger represents the base of the spine. This spinal base looks like a stinger, and that is where the Kundalini resides. The sign of Scorpio starts in the month of October. ‘October’ broken down in numerology equals 33, and there are also 33 vertebrae in the human spine.

Odin had two raven's named *Huginn* and *Muninn*. Huginn means ‘thought’ and Muninn means ‘Memory’. They are the 15th and 16th Runes, which represents the left and right sides of the brain. The 15th and 16th Rune look like crow’s feet. Thought and Memory are both done by the brain. ‘Left brain’ broken down in numerology will equal 42 (6), and also 15 of the 15th Rune numerologically equals 6. Next, the ‘right brain’ equals 61 (7), and also 16 of the 16th Rune numerologically equals 7. Old Norwegian pictures also show both ravens sitting in Odin’s hat on top of his head, showing that they represent the left and right sides of the brain.

Odin had two wolves named *Geri* and *Freki*, who are also the Alpha and Omega, that is spoken of in the Bible. They are the 8th and 17th Runes, which are also 36 and 37 on the calendar of evolution. In that calendar,

36 is the first and 37 is the last. They represent the good and bad voice some hear during schizophrenia. In Greek mythology they are known as the three headed dog Cerberus who guards the gates of hell. These three heads represent the good voice, the bad voice, and the schizoid person in the middle. They also represent seeing the red frequency of 36 which represents imperfection, while seeing the gold frequency of 37 represents perfection. They also represent the Ovum being 36 and the Zygote being 37. (‘Semen’ and ‘Ovum’ together equal the numerological value 37).

The 11th Rune is Zeus’ lightning bolt. It also represents the Light of God, also referred to as Jesus in the stories of the Bible. The name Jesus broken down in numerology equals 11, showing that Jesus is the lightening bolt. Zeus is the ancient name for the planet we now call Jupiter. The lightening also bolt represents the electric jolt and spasms of an orgasm.

The 12th Rune is the hammer of Thorr, which is really Earth, Wind (or Air), Water, and Fire going up in frequency, caused by the electric jolt of the 11th Rune. The hammer of Thorr is what slams into the Kundalini forcing it up the spine until it hits the crown chakra at the top of the head.

The 18th Rune, which is the symbol of two lightening bolts side by side (and the last Rune on the calendar of evolution) represents that the circle is complete. At this stage, we are full of light and equal to the sun Helios (meaning Christ like).

The highest letter of this ancient alphabet is the G. Is it a coincidence that this letter is also present of the symbol for Freemasonry? Some believe that this G stands for Geometry. The most likely explanation is that this G refers to God, meaning the sun (called Helios). As we saw before, the G symbol is also a double S symbol. That is why the Nazis used SS. This SS stood officially for the German word ‘*Schutzstaffel*’, the Nazi paramilitary regiments, meaning ‘protection echelon’. The SS collar insignia, known as the *sig-runen*, was worn on the right collar patch of the uniforms. The real meaning of SS is of

course the honoring of the light of God. The swastika has the same meaning, since it also represents two S symbols. This is just a small example that shows that the Nazis were based on occult knowledge. Nowadays, we find the application of this occult knowledge in the design of the logos of German car brands.

The 18 letters from the Runes alphabet are divided in three groups. Each group consists of 6 symbols (or numbers). We can summarize this as 6 6 6. Each group corresponds to one third of the full circle. The figure to the left shows these three third parts. The figure to the right shows the logo of Mercedes-Benz. The resemblance is very striking. Please note that the numerological value of Mercedes-Benz is 56 (11).

Mercedes-Benz

Another striking resemblance we find between the *Sol* symbol from the Runes alphabet and the logo of the car brand of Opel. Next, the logo of the car brand of VW (meaning 'Volkswagen' in German) looks like the *Fa* symbol combined with its mirror image.

Meaningful Numbers

The more we learn about Numerology, the more numbers become meaningful to us. Here we focus on the most common meaningful numbers. Within the group of the one-cipher numbers, the 1 stands for oneness, wholeness, or unity. It is the first number, so it also means the number 1. The highest one-cipher number is the 9, which is the most remarkable number in Numerology.

When we look at numbers consisting of more than one cipher, the prime numbers turn out to be the most meaningful. Between 9 and 18, we find three of these primes: 11, 13, and 17. The number 11 represents 'Mastery of Wholeness'. The double 1 of 11 means: the Master is capable of creating another 1.

The number 13 represents the Creation, since each process of creation occurs in 13 phases. These are the 13 Tones of the Mayan calendars, showing the 7 Days of Creation together with the 6 Nights in between these 7 Days. Please note that the word 'Maya' has the numerological value of 13.

The highest prime within the number group from 1 up to 18 is 17. This is the numerological value of the word 'God'. This value of 17 can be considered to be the combination of 'God is 1', meaning 'God is everything' and 'God is 7', meaning 'God is perfect'. The word 'perfect' has 7 letters, and its numerological value is 37 (1). Furthermore, the numerological value of seventeen is also 37 (1).

Now, let us look at some symbols that are very common in the present day USA. To start with, there are some meaningful numbers hidden in the national flag of the USA. This flag has 13 stripes. The 7 red stripes represent the 7 Days of Creation, while the 6 white stripes represent the 6 Nights in between these 7 Days. The 50 stars are placed in 9 rows. These rows have an alternating amount of 5 and 6 stars. Adding up 5 and 6 gives 11, which is the number of mastering oneness.

Furthermore, we find very remarkable applications of Numerology on the backside of the 1 US dollar bill.

The numerological value of the phrase ‘In God we trust’ in the middle of this bill is 58 (13). The circles on both side of the word ‘one’ under this phrase form ‘The Great Seal of the United States’. Under the image of a remarkable pyramid, we find the words ‘The Great Seal’, corresponding to a numerological value of 49 (13). Under the image of a remarkable eagle, we find the words ‘of the United States’, corresponding to a numerological value of 67 (13). These are by long not the only three references to the meaningful number of 13. Let us zoom in on both circles.

Under the disconnected top (containing an eye), the pyramid has 13 layers. Above the pyramid, we find the 13 letters of the Latin words ‘Annuit Coeptis’, meaning ‘Announcing conception’, and corresponding to a numerological value of 58 (13). Again, this is a trinity of references to the meaningful number of 13.

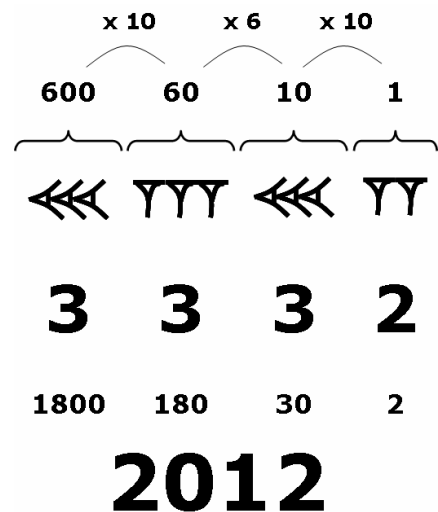

The inscription at the bottom layer of this pyramid consists of 9 Roman numerals (representing the year 1776). Under the pyramid, we read the 17 letters of the Latin words ‘Novus Ordo Seclorum’. ‘Novus’ means new, and ‘Ordo’ means (pecking) Order. This correct Latin word for the third part is *Seculorum*, meaning ‘of all ages’. The vowel ‘u’ was deliberately ‘swallowed’ in

order to arrive at the amount of 17 letters, representing God. Since this phrase has no special numerological meaning, this swallowing had no significant numerological effect. We find another reference to God in the 17 letters of ‘of the United States’. The whole phrase of ‘The Great Seal of the United States’ consists of 29 letters, which numerologically equals 11.

At the right-hand side of the backside of the one-dollar bill, we find a remarkable eagle. With his right foot, this eagle holds a branch with 13 leaves and 13 berries. With his right foot, this eagle holds 13 arrows. On the eagle's chest, we find a shield showing the 13 stripes. Above the eagle's head, we find 13 stars in the shape of the Seal of Solomon (also known as the Star of David). In his beak, the eagle holds a ribbon on which we find the 13 letters of the Latin words 'E Pluribus Unum', meaning 'Out of Many, One'. This means that we in total find 11 references to the number 13 in The Great Seal of the United States.

Let us now count the eagle's feathers. In his tail we find 9 feathers. This means that we find one reference to the number 9 in each circle. Next, the right wing of the eagle contains 33 feathers, and his left wing 32. Adding up both numbers results in the numerological value of 11. But that is not all about 33 and 32. First of all, the number 33 plays a key role in the symbolism of Freemasonry. Their community is shaped like a pyramid consisting of 33 levels. Most of the US presidents were (or are) 33rd Degree Freemasons.

We also find the number 33 and 32 carved in Sumerian writing on one of the Heel Stones of Stonehenge in the UK. In our decimal counting system, each cipher to the left has a 10 times greater value than the adjacent cipher to the right. In the Sumerian counting system, we find an alternation of a 10 times greater value followed by a 6 times greater value. This means that the Sumerian number of 3332 represents (the year) 2012 in our decimal system. When the Eagle's wing feathers represent Sumerian numbers, then the one-dollar bill points towards the

magical year of 2012. Also the Mayan calendars point towards 2012 AD, and so do the 11 pyramids on the Giza plateau in Egypt. To learn more about this (while we actually live in this magical year 2012), read the free online e-book called ‘Wholly Science’ on Pateo.nl.

Remarkable numerological values

There are three sovereign states within national capitals. We find these sovereign states in Washington DC, London and Rome. The sovereign state in the heart of Rome is called Vaticanus in Latin. All three names have the numerological value of 11:

Washington DC = 56 (11)

London = 29 (11)

Vaticanus = 29 (11)

TO BE CONTINUED

(This is just version 0.4 of this paper. It was released on January 11th, 2012, in order to support the videos on the youtube channel of Billy Dale Lawhorn called Batman72703. Much more information will be added to this paper in de the coming days.)
